

Educating in Trust, Educating for Trust

Rome, LUMSA 27-28 January 2023

Resolutely humanist and deeply educational, the *Global Compact on Education* called for by Pope Francis is an invitation to all researchers in Catholic education to a determined commitment. ACISE wishes to engage for three years in a **research project on the educational and anthropological foundations of the global compact on education**, in active collaboration with Organisations of Catholic educators, teachers and students and with all researchers in Catholic education within IFCU. Through this project, ACISE wishes to involve a large number of Catholic educational networks and to allow the elaboration of a charter of trust based on the educational and teaching principles updated in this research project.

ACISE is an Association of Catholic Institutes of Education, recognised as an International Research Group (IRG) of the **FIUC/IFCU** – International Federation of Catholic Universities.
